PROJECTS

Zomato Restaurant Analysis | Power BI | [Link](#)

- Analyzed dataset of 9551 restaurants in 15+ countries, which shows average rating of 2.6/5 & average cost 1.2K.
- Crafted Power BI reports for global analysis & restaurant performance by using Power Query, Charts and DAX for calculations.

OLA Business Analysis | Power BI | [Link](#)

- Developed an interactive Power BI dashboard to visualize multi-dimensional ride-hailing data, providing actionable insights into daily operational performance and ride economics..
- Engineered dynamic data visualizations categorizing key performance indicators (KPIs) by Vehicle Type (e.g., Prime, Mini, Auto), enabling stakeholders to quickly identify top-performing vehicle segments.

Data Warehouse Analysis | SQL | [Link](#)

- Designed and deployed optimized SQL views (report_customers, report_products) using CTEs to transform 60,000+ rows of raw relational data into clean, analysis-ready datasets.
- Applied advanced window functions (LAG, OVER(), PARTITION BY) on 60,000+ rows to compute running totals and period-over-period variances, and used DATEDIFF/DATETRUNC to calculate customer lifespan, order recency, and temporal sales aggregations.

Exploratory Data Analysis | SQL | [Link](#)

- Built complex SQL (ROW_NUMBER, SUM() OVER, subqueries, LEFT JOINs across star schema) to compute regional sales distributions, rank top/bottom 5 products, map customer behavior to revenue, and calculate dynamic age brackets and lifecycle using DATEDIFF/GETDATE.

E-commerce Sales Analysis | MS Excel | [Link](#)

- Designed and maintained dynamic performance dashboards in Excel, monitoring over \$1.3M in total multi-year sales and providing actionable insights to executive teams.
